PART I: BASIC COMPLEX ANALYSIS

1. A Bird’s Eye View of the Complex Plane
   1.1 Introduction
   1.2 Mathematical Logic
   1.3 Development of the Complex Number System and Its Algebra
   1.4 Arithmetic of the Complex Numbers
   1.5 Geometry of the Complex Plane
   1.6 Extended Complex Plane and the Stereographic Projection
   1.7 Topology of the Complex Plane
   1.8 One-Point Compactification and the Riemann Sphere
   1.9 Analysis in the Complex Domain
   1.10 Sequences and Series
       Solved Exercises 56
       Exercises 64
       Notes 65
       References 65

2. Elementary Properties of Analytic Functions
   2.1 Introduction to the Concept of an Analytic Function
   2.2 Power Series
   2.3 Linear Fractional Transformations
   2.4 Exponential and Trigonometric Functions
       Solved Exercises 92
       Exercises 103
       Notes 104
       References 104

3. Conformal Mappings
   3.1 Definition and Properties of Conformal Mappings
   3.2 Elementary Conformal Mappings
   3.3 Physical Applications of Conformal Mappings

 Contents
PART II: COMPLEX INTEGRATION

4. Complex Integral Calculus 152
   4.1 Basic Definition and Properties of Complex Integration 152
   4.2 Cauchy's Theorems 158
   4.3 General form of Cauchy's Theorem 172
   4.4 Cauchy's Integral Formula and Its Applications 182
   4.5 Singularities 204
   4.6 Calculus of Residues 220
   4.7 Computation of Integrals 232
   4.8 Harmonic Functions 264
      Solved Exercises 283
      Exercises 322
      Notes 326
      References 331

PART III: SPECIAL TOPICS IN COMPLEX ANALYSIS

5. Riemann Mapping Theorem 333
   5.1 Riemann Mapping Theorem and Boundary Behaviour 333
   5.2 Schwarz-Christoffel Formula 349
   5.3 Conformal Mappings of Doubly Connected
      Regions and Regions of Finite Connectivity 356
   5.4 Simply Connectedness and Equivalent Conditions 365
   5.5 Analytic Automorphisms of Regions in the Complex Plane 371
   5.6 Univalent Functions Defined on the Open Unit Disc 383
   5.7 A Brief History of the Bieberbach Conjecture and Its Solution 403
      Solved Exercises 409
      Exercises 416
      Notes 417
      References 420

Solved Exercises 409
