List of Figures and Tables  xv

Foreword  xix

M. David Merrill

Acknowledgments  xxiii

Introduction  xxxv

Chapter 1: The E-Learning Challenge  1

The Knowledge Society  2
Knowledge Management  3
Pedagogy and Technology  5
Network-Based Learning Models  8
Processes and Development Tools  14
Platforms and Portals 19
Summary 22

Chapter 2: Virtual Learning Centers 25
The Concept of a Learning System 26
Actors’ Roles and Resources 31
Explor@: A Web-Based Support System 40
Integrating a Learning Event into a Virtual Center 45
Versatile and Flexible Architecture 49
Summary 53

Chapter 3: Foundations of Instructional Engineering 55
Systemic Methods 56
Instructional Systems Design 60
Software Engineering 62
Knowledge Engineering 66
A Knowledge Representation System 69
Skills and Competencies 86
Summary 100

Chapter 4: MISA: An Instructional Engineering Method 103
Overview of the MISA Method 104
Conceptual Levels of a Learning System 109
Processes and Tasks 113
Operational Principles 115
Context and Frontier 119
Summary 121

Chapter 5: Instructional Engineering on the Web 125
General ADISA Features 126
Designing the Main Components of a Virtual Learning Center 132
Summary 141
Chapter 6: Reengineering a University Course for the Web 143

Definition of the Project 144
Preliminary Analysis 145
Architecture 149
Design of Learning Materials 156
Development and Validation 159
Delivery Planning 162
Discussion 163

Chapter 7: Engineering a Vocational E-Learning Environment 165

Definition of the Project 166
Preliminary Analysis 167
Architecture 171
Design of Learning Materials 175
Development and Validation 180
Delivery Planning 182
Discussion 183

Chapter 8: Engineering a Workplace E-Learning Environment 185

Definition of the Project 186
Preliminary Analysis 186
Architecture 191
Design of Learning Materials 192
Development and Validation 196
Delivery Planning 198
Discussion 199

Conclusion 201

Glossary 209

Notes 231
